Sloan DropSpot™ Bottle Fillers

Sloan DropSpot™ Bottle Fillers and Coolers embrace style and promote sustainable drinking practices with every sip.

*DRS110 DropSpot™ On-wall Bottle Filler with Single-level Cooler in Stainless Steel finish.
Shown opposite: DRS120 DropSpot™ On-wall Bottle Filler with Bi-level Cooler in Stainless Steel finish.*

Fresh water in an instant

The DRS100 pairs sleek styling with cutting-edge sensor technology to elevate your space with a fast way to hydrate. The slim profile and small footprint create a seamless water filling experience for interior spaces.

Touch-free with rapid refill

Sloan's advanced sensor and dispensing technology ensures hygienic, hands-free operation with rapid refills. When the sensor is activated, the backlit LED illuminates the bottle filling area. The laminar-style water stream reduces water splash and rapidly fills bottles up to 1.2 gallons per minute (gpm). There is a 20 second max run time to conserve water.

Cool hydration

Add the remote chiller to the DRS100 for lasting cool hydration (see further information on page 15). This advanced refrigeration system delivers an impressive chilling capacity of 8.0 gallons per hour (gph), keeping every sip refreshingly cool at 50°F. Remote chillers are available as part of the DRS100 refrigerated unit or separately as an accessory for the DRS100 unrefrigerated unit.

DRS100 DropSpot refrigerated unit shown in Black Powder Coat finish.

DRS100 DropSpot refrigerated and non-refrigerated units available in Stainless Steel and Black Powder Coat finish options. See page 14 for ordering information.

The DRS100 DropSpot™ Bottle Fillers enhance workplace hygiene and sustainable drinking practices, shown in Black Powder Coat finish.

Featured in a Stainless Steel finish, the DRS110 DropSpot™ Bottle Filler with Single-level Cooler is ideal for higher education settings.

DRS110 DropSpot™ On-wall Bottle Filler with Single-level Cooler

A safer way to hydrate

The DRS110 offers all the benefits of the DRS100 Bottle Filler and includes an easy-to-clean, hygienic water cooler.

Healthier, cleaner components

The bubbler and push bar are coated with an antimicrobial finish that reduces the risk of germ transmission and features a design that makes sanitization and cleaning simple.

All DropSpot Bottle Fillers and Coolers are certified to comply with NSF61 standards for safer drinking water consumption.

DRS110 DropSpot™ Bottle Filler with Single-level Cooler are available in Stainless Steel and Black Powder Coat finish. See page 14 for ordering information.

DRS120 DropSpot™ On-wall Bottle Filler
with Bi-level Cooler

High performance for high traffic

The DRS120 versatile design offers a quick, accessible solution for the demands of high-traffic environments. Its ability to accommodate simultaneous refills enables quick hydration on the go.

Flexible mounting for seamless integration

The versatile bi-level design allows for standard high-left/low-right or alternate low-left/high-right installation. This flexible design ensures a perfect fit in most spaces, enhancing its usability and integration.

Inclusive design for all

Sloan DropSpot bottle fillers with coolers are built for everyone and, when installed properly, meet ADA requirements. This ensures an accessible and welcoming experience for all users.

Featured in a Stainless Steel finish, the DRS120 DropSpot Bottle Filler with Bi-level Cooler makes water access convenient for high traffic areas like convention centers, stadiums, and airports.

DRS120 DropSpot Bottle Filler with Bi-level Cooler are available in Stainless Steel and Black Powder Coat finish. See page 14 for ordering information.

Packed with features

Sloan DropSpot™ Bottle Fillers are packed with features that promote access and performance.

Durable and attractive materials

DropSpot Bottle Fillers are crafted from durable, premium materials. Choose everlasting stainless steel or go for a modern aesthetic with the black powder coated galvanized steel.

Push bar technology

The patent pending push bar is designed to be activated at any touch point. This feature enhances usability for all. Available on DRS110 and DRS120.

Pleasant bottle filling experience

Sloan's proven sensor and water dispensing technology combine for a pleasant, hands-free bottle filling experience enhanced by two backlit LED lights that illuminate the bottle filling area while in use.

Ready to retrofit

DropSpot Bottle Fillers match most manufacturers' rough-ins, simplifying installation and making upgrading easier.

Easy maintenance

Sloan DropSpot™ Bottle Fillers are designed with maintenance in mind, giving staff access and tools to make adjustments with ease.

Filter alerts

The filter status indicator light is unobtrusive and remains off until filter replacement is needed.

Utility is key

A proprietary key opens the push bar and provides quick access to service parts for ease of maintenance. Available for DRS110 and DRS120.

Swing-open filter access

The DRS100 features a swing-open cabinet that provides easy access to the filter and internal components.

Drop-down filter access

The convenient drop-down door assembly provides easy access to the filter on filtered DRS110 and DRS120 models.

Water filtration enhances health

Enjoy the confidence and comfort that comes with Sloan's state-of-the-art water filtration technology. Water filters help deliver safer drinking water by reducing harmful contaminants and impurities. This means every sip is refreshing and supports your well-being.

The problem with lead contamination

The toxic heavy metal lead poses a grave threat to our health and has been linked to developmental issues in children. Shockingly, an estimated 22 million people consume water that flows through lead pipes. Moreover, numerous U.S. cities have experienced significant lead contamination in their drinking water in recent years.

The problem with PFAS contamination

Scientific research shows that exposure to certain PFAS may be linked to harmful health issues. Recognizing this danger, the Environmental Protection Agency (EPA) recently launched a PAS Strategic Roadmap to address these harms.

Sloan's filtration helps address these problems

Investing in a high-quality water filter is crucial for safeguarding human health. Sloan's water filters reduce PFOA and PFOS, the two most widely used chemicals in the PFAS group. Sloan's filter is also engineered to comply with NSF-42, 53, and 401 standards. It enhances taste and reduces lead, microplastics, cysts, Class 1 particulates, chlorine, and odors.

50B/\$1B

Bottles vs dollars wasted

Americans use about 50 billion water bottles a year, wasting more than a billion dollars worth of plastic.

100-1000

Years to decompose

Plastic bottles used today may be around for hundreds, if not thousands, of years.

Microplastics

Never go away

The plastics from single-use plastic water bottles never fully decompose but are broken down into microplastics which can end up in our bodies. Bottle fillers benefit human health by reducing the usage of single-use plastic water bottles.

Promote sustainability and wellness one refill at a time

Installing bottle fillers are a practical way to promote sustainability, reduce waste, and preserve our planet for future generations. All Sloan DropSpot™ Bottle Fillers provide a convenient and accessible way to refill reusable bottles with fresh water. By encouraging the use of reusable bottles, bottle fillers help minimize plastic waste, a significant environmental concern contributing to pollution and habitat destruction. It also conserves valuable natural resources, such as oil and water used in the production and transportation of plastic bottles.

75% of kids

Lack adequate hydration

75% of school-aged children in the United States do not consume the recommended daily allowances for water, which is essential for human health. Bottle fillers can encourage water consumption by providing easy access to drinking water.

Saving bottles

The counter display indicates the number of 16 oz plastic bottles saved.

Tracking water consumption

While in use, the counter display shows the ounces of water dispensed, a handy feature for the health-conscious user to track their water consumption.

Choose the DropSpot™ that fits your needs

Sloan DropSpot Bottle Fillers come with a variety of options and finishes to meet your project needs.

* Filter Upgrade Kits available for all DropSpot unfiltered models.

† Remote Chiller refrigeration upgrade available for non-refrigerated DRS100 models.

- Stainless Steel
- Black Powder Coat

Sloan DropSpot™ parts and accessories

Upgrade your DropSpot Bottle Filler with genuine Sloan parts and accessories.

Filter Upgrade Kit for DRS100

33830001 **FA3000-DRS100**

This filter kit converts an unfiltered DRS100 unit to a filtered unit.

Filter Upgrade Kit for DRS110/DRS120

33830002 **FA3000-DRS110-120**

Upgrade your DRS110/DRS120 to a filtered unit with this kit that includes the drop down assembly and filter cartridge.

Remote Chiller for DRS100

33830006 **RC8000**

The compact and efficient remote chiller cools large quantities of room-temperature drinking water to 50°F. Available for DRS100.

Single pack filter

33830003 **FC3000R**

1 pack of 3000-gallon replacement filter for DropSpot Bottle Fillers

Multi pack filters

33830014 **FC3000M**

Master pack of 20 3000-gallon replacement filters for DropSpot Bottle Fillers
